

# Admin Wireframe Feedback

## General Feedback

- The table placements should be configurable - maybe using an nxm grid layout for simplicity. (mock wireframe attached)
  - To clarify further, super admin should also have access to this for initial setup

## Page 1

- Show single sign on (SSO)

## Page 5

- What if it's a brand new restaurant that isn't registered on Google yet?
- What about restaurants that have multiple franchises?

## Page 10

- This is not really what we want in a dashboard... (mock wireframe attached)

## Page 11

- By "print", you mean send the digital receipt to the user's device as well, right?

## Page 17

- Not happy with the layout here, this should be accessible through the dashboard (mock wireframe attached)

## Page 19-20

- Same thing here, the merge table and table status pages provided (mock wireframe attached)

When merged, dim the tables and make them unselectable

When "Merge" is pressed, the tables become selectable.

You can select Table 4, 5, and 6, then confirm the merge.
